

Tugas 4 Latihan 5.3

Lab Pemrograman Web (MONOLITH – LARAVEL)

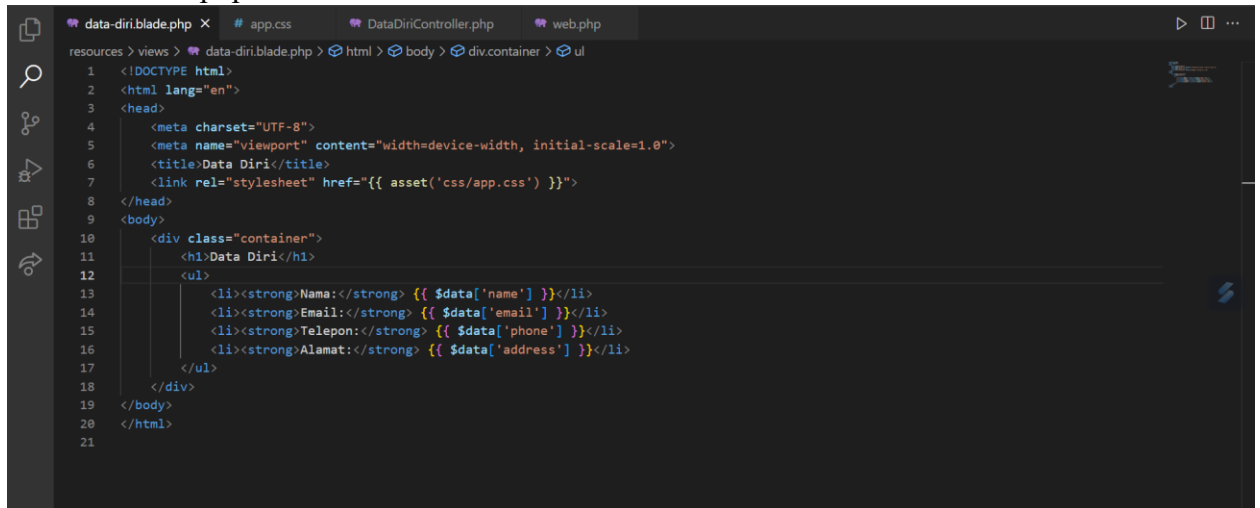

Nama : Risma Handayani

NPM : 222310015

Hasil Pengerjaan Soal Latihan 5.3 (Soal modul Pemrograman Web)

Buatlah tampilan website yang berisi data diri menggunakan framework laravel

- data-diri.blade.php

A screenshot of a code editor showing the file 'data-diri.blade.php'. The code is an HTML template for a 'Data Diri' (Personal Data) page. It includes a head section with a meta charset of 'UTF-8', a viewport meta tag, a title 'Data Diri', and a link to 'app.css'. The body contains a container with an h1 'Data Diri' and a list of personal details: Name, Email, Telephone, and Address, each rendered using Laravel's Blade syntax {{ \$data['field'] }}.

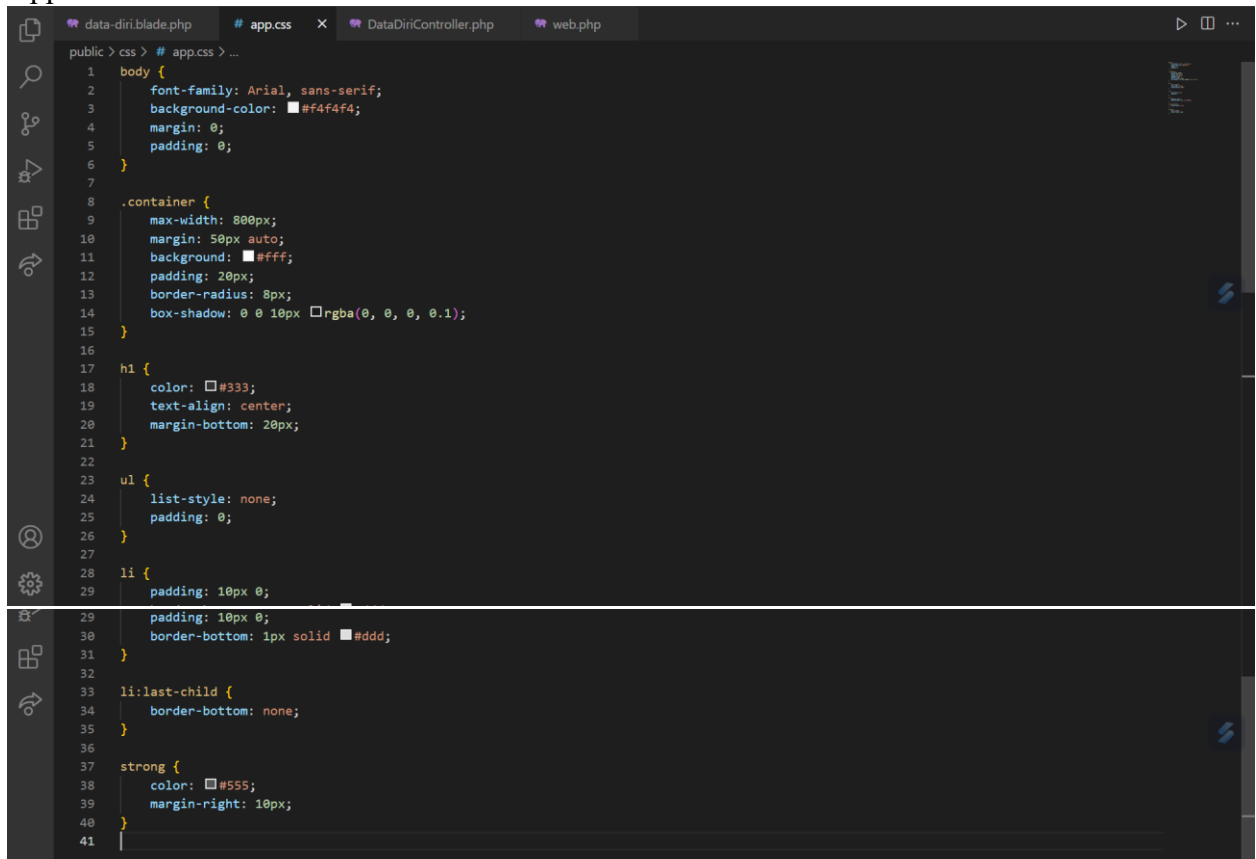

```
1 <!DOCTYPE html>
2 <html lang="en">
3 <head>
4     <meta charset="UTF-8">
5     <meta name="viewport" content="width=device-width, initial-scale=1.0">
6     <title>Data Diri</title>
7     <link rel="stylesheet" href="{{ asset('css/app.css') }}">
8 </head>
9 <body>
10     <div class="container">
11         <h1>Data Diri</h1>
12         <ul>
13             <li><strong>Nama:</strong> {{ $data['name'] }}</li>
14             <li><strong>Email:</strong> {{ $data['email'] }}</li>
15             <li><strong>Telepon:</strong> {{ $data['phone'] }}</li>
16             <li><strong>Alamat:</strong> {{ $data['address'] }}</li>
17         </ul>
18     </div>
19 </body>
20 </html>
21
```

- DataDiriController.php

A screenshot of a code editor showing the file 'DataDiriController.php'. The code defines a 'DataDiriController' class that extends 'Controller'. It includes a namespace declaration, an import for 'Illuminate\Http\Request', and an 'index()' method. The 'index()' method sets a local variable '\$data' with personal information and returns a view 'data-diri' with the data.

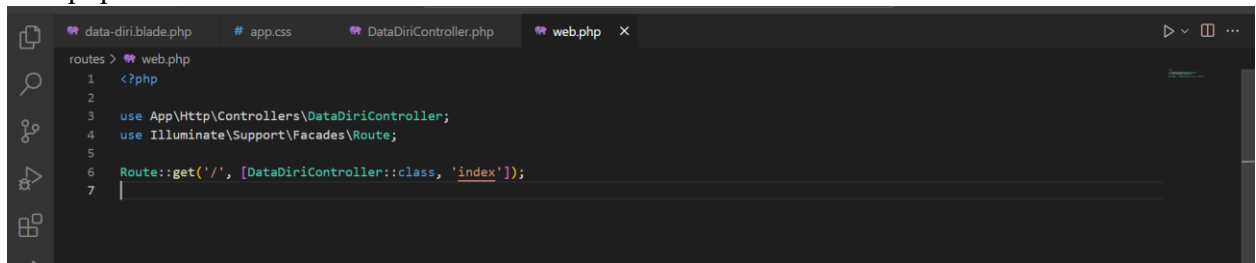

```
1 <?php
2
3 namespace App\Http\Controllers;
4
5 use Illuminate\Http\Request;
6
7 class DataDiriController extends Controller
8 {
9     public function index()
10     {
11         $data = [
12             'name' => 'Risma Handayani',
13             'email' => 'rismahandayani001@gmail.com',
14             'phone' => '0814-1322-5122',
15             'address' => 'Kp.Sari Gading rt 05/07, Kel.Rangga Mekar, Kec.Bogor Selatan'
16         ];
17         return view('data-diri', compact('data'));
18     }
19 }
20
```

- App.css

```
public > css > # app.css > ...
1  body {
2      font-family: Arial, sans-serif;
3      background-color: #f4f4f4;
4      margin: 0;
5      padding: 0;
6  }
7
8  .container {
9      max-width: 800px;
10     margin: 50px auto;
11     background: #fff;
12     padding: 20px;
13     border-radius: 8px;
14     box-shadow: 0 0 10px rgba(0, 0, 0, 0.1);
15 }
16
17 h1 {
18     color: #333;
19     text-align: center;
20     margin-bottom: 20px;
21 }
22
23 ul {
24     list-style: none;
25     padding: 0;
26 }
27
28 li {
29     padding: 10px 0;
30     padding: 10px 0;
31     border-bottom: 1px solid #ddd;
32 }
33 li:last-child {
34     border-bottom: none;
35 }
36
37 strong {
38     color: #555;
39     margin-right: 10px;
40 }
41
```

- web.php

```
routes > web.php
1  <?php
2
3  use App\Http\Controllers\DataDiriController;
4  use Illuminate\Support\Facades\Route;
5
6  Route::get('/', [DataDiriController::class, 'index']);
7
```

Output Program:
